For families/households with more than 8 persons, add \$5,140 for each additional person.

- The foregoing discount percentage has established in a manner intended to comply with applicable Federal law, which provides that the hospital may not bill a patient eligible for financial assistance more than the amounts general billed (“AGB”) by the Hospital to patients who have insurance covering such care. The Hospital has calculated its AGB using the look-back method set forth in applicable Treasury Regulations, considering amounts paid by Medicare and Commercial payors.
- The Hospital will recalculate its AGB periodically (and at least annually) and, based thereon, may adjust the discount percentages set forth above. Any such adjustments will be effectuated through a revision to this exhibit, which will be signed and dated by the Benefis CFO.
